SUMMARY

IT professional with a solid background in providing technical support and issue resolution across hardware and software. Proficient in troubleshooting operating systems, Active Directory, and ticketing systems. Expertise includes computer hardware/software installation, technical and network support, server administration, and Office 365. Strong communication and customer service skills with a proven ability to build client relationships and collaborate effectively. Dedicated and adaptable, committed to delivering high-quality IT support and advancing into systems engineering.

TECHNOLOGY PROFICIENCIES

- **Operating Systems:** Windows Server 2019/2022, Ubuntu Linux, Windows 11
- **System Administration:** Active Directory (ADAC, AD Recycle Bin), Microsoft 365, Google Workspace, Odin, Optius
- **Networking:** TCP/IP, DNS (Zones & Records), DHCP (Scopes & Reservations), VPN, LAN/WAN Troubleshooting
- **Virtualization & Cloud:** Azure Virtual Desktop (AVD), RDP, VMware, Hyper-V
- **ITSM & CRM:** ServiceNow, Salesforce, Jira

TECHNICAL PROJECTS & HANDS-ON LABS

Windows Server Infrastructure & Active Directory Administration

- Installed AD DS roles and promoted a standard Windows Server to a Domain Controller for a simulated corporate network infrastructure.
- Managed user lifecycles via ADAC using targeted naming conventions and complex group nesting (Global/Universal/Domain Local).
- Implemented password enforcement policies, account expirations, and restored deleted objects using the Active Directory Recycle Bin.
- Deployed DNS and DHCP server roles, configuring zones, records, IP scopes, and device reservations.

Linux Systems Administration

- Administered Ubuntu Linux systems via the CLI, analyzing kernel variations and disk partition structures.
- Managed system user accounts, configured shell variables, and enforced file-system security via permissions.
- Utilized administrative utilities to track running processes and analyze system logs for troubleshooting.

WORK EXPERIENCE

Senior IT/Technical Support Associate, Infosys

12/2025 – Present | Richardson, TX

• Infrastructure Associate (Client Project)

- Provisioned and optimized fiber-optic network infrastructure (MST, ONT, and Splitters) using specialized GIS and inventory tools (Odin, Optius) to ensure seamless connectivity for end-users.
- Managed secure remote access via Azure Virtual Desktop (AVD), maintaining strict adherence to data privacy and security protocols while handling sensitive customer and network data.
- Troubleshot Layer 1 and Layer 2 connectivity issues in real-time for field technicians, resolving complex routing and port allocation conflicts to maintain network uptime.
- Standardized technical documentation by migrating real-time field data into Salesforce and Excel, ensuring 100% accuracy in network reporting and audit trails for management.
- Identified and resolved network discrepancies between physical field hardware (FDH/FSAI) and logical system maps, performing the "source of truth" verification essential for network integrity.

- Collaborated via MS Teams and Salesforce to prioritize high-traffic tickets, balancing real-time emergency field support with offline infrastructure maintenance.

Imaging Operations Specialist, Iron Mountain

09/2025 – 12/2025 | Dallas, TX

- Managed and processed high-volume document preparation for complex digitization projects, handling an average of 15,000+ documents per week.
- Operated and maintained high-speed production scanners to perform precise document digitization, consistently achieving a 99%+ quality and legibility rate against client standards.
- Conducted rigorous Quality Assurance (QA) inspections on all captured images, correcting resolution, orientation, and legibility issues to ensure optimal archival compliance.
- Indexed and applied critical metadata (e.g., date, client ID, document type) to digitized files, enabling swift retrieval and accurate integration into client Enterprise Content Management (ECM) systems.
- Maintained strict chain-of-custody protocols and adhered to regulatory requirements (e.g., HIPAA, GDPR, or financial regulations) when handling sensitive or confidential records.
- Optimized scanning workflows to improve daily throughput, contributing to a documented 10% increase in processing efficiency over a three-month period.
- Utilized proprietary tracking systems to log document movement, production metrics, and inventory status, ensuring full accountability throughout the digitization lifecycle.

Senior IT/Technical Support Associate, Infosys

04/2021 – 02/2024 | Richardson, TX

- **Systems Specialist (Client Project)**
 - Deployed and managed Optical Network Terminal (ONT) connections for secure and efficient fiber optic broadband service delivery.
 - Enforced strict security protocols to prevent unauthorized access and protect data integrity.
 - Performed advanced network diagnostics and performance tuning to optimize system reliability and uptime.
 - Utilized terminal applications (SWITCH, LFACS, EMS, CMS) for network configuration, monitoring, and troubleshooting, enhancing security.
 - Coordinated communication and collaboration between engineering teams and server technicians for infrastructure upgrades.
 - Achieved daily resolution targets for tickets managed within the WMS ticketing system.
 - Documented all system updates for record-keeping and compliance purposes.

EDUCATION

Master of Science in Information Technology Management,
Western Governors University

02/2026

Bachelor of Science in Information Technology,
Western Governors University
